

CONCEPTFOLDING 77 FOLDING DOORS

ConceptFolding 77 is designed to create large, fully openable glazed surfaces that enhance spatial connection and natural light.

By allowing multiple panels to fold and stack laterally, the system enables a complete opening of the façade, supporting seamless transitions between interior and exterior spaces. Its configuration flexibility makes it suitable for projects that prioritize openness, accessibility, and visual continuity.

Engineered for consistent performance and smooth operation, ConceptFolding 77 combines large-format capability with reliable thermal and weather performance.

- MADE IN CANADA
- HIGH PERFORMANCE ALUMINUM SYSTEMS FROM REYNAERS

PERFORMANCE HIGHLIGHTS

- **Full-Opening Capability:** Folding configuration allows multiple panels to stack and create wide, unobstructed openings
- **Large-Format Design:** Supports configurations of up to eight panels, enabling expansive glazed surfaces
- **Thermal Performance:** Achieves insulation values of $U_w 0.36$ (double glazing) and $U_w 0.28$ (triple glazing) for energy-efficient applications
- **Weather Performance:** Air infiltration of 0.1 cfm/ft^3 and water resistance up to 8 psf, supporting reliable performance under exposure
- **Panel Capacity:** Supports vent weights up to 264 lbs, ensuring stability in large-format applications
- **Smooth Operation:** Designed for controlled and consistent folding movement across multiple panels
