

MASTERLINE 10 GLASS DOORS

MasterLine 10 glass doors are developed for projects that require enhanced thermal performance, durability, and long-term reliability.

Built on an advanced aluminum platform, the system delivers strong insulation and consistent performance under demanding climate conditions. Its robust construction and refined detailing make it suitable for both new-build and renovation projects focused on energy efficiency.

Capable of reaching Passive House performance levels, MasterLine 10 provides a high-performance door solution aligned with sustainable building strategies.

- MADE IN CANADA
- HIGH PERFORMANCE ALUMINUM SYSTEMS FROM REYNAERS
- SOBINCO ACCESORIES

PERFORMANCE HIGHLIGHTS

- **Passive-Level Insulation:** Engineered to achieve thermal performance values as low as 0.16 Btu/hr-ft²·°F (triple glazing), depending on glazing and system configuration.
- **Extreme Weather Resistance:** Tested to Class 4 / 9A / C3 for air permeability, water tightness, and wind load resistance
- **Flexible Sizing:** Supports vent heights up to 3000 mm, enabling full-height door applications
- **Acoustic Performance:** Up to Rw 40 dB for improved interior comfort
- **Advanced Door Features:** Supports access control, concealed drainage, low thresholds, and Softclose functionality
- **Enhanced Security:** Burglar-resistant configurations available for increased protection
