

SLIMLINE 38 WINDOWS

SlimLine 38 is designed to deliver a refined steel-look aesthetic within a high-insulation aluminum window system.

Its slim profiles and minimal sightlines create a clean, architectural appearance, making it well suited for contemporary projects that require both visual lightness and reliable performance. Developed for long-term durability, the system combines consistent weather resistance with energy-efficient performance.

SlimLine 38 offers a range of minimalistic configurations to support precise architectural expression.

PERFORMANCE HIGHLIGHTS

- **Steel-Look Design:** Slim, minimalistic profiles designed to replicate the appearance of traditional steel windows
- **High Performance Insulation:** Engineered to achieve thermal performance values as low as $U_w = 0.23 \text{ Btu/hr}\cdot\text{ft}^2\cdot^\circ\text{F}$ (double glazing) and $0.16 \text{ Btu/hr}\cdot\text{ft}^2\cdot^\circ\text{F}$ (triple glazing), depending on glazing and system configuration.
- **Reliable Weather Performance:** Tested to Class 4 / 9A / C4 for air permeability, water tightness, and wind load resistance
- **Slim Yet Structural:** Supports vent heights up to 2800 mm and weights up to 170 kg, maintaining performance with reduced profile dimensions
- **Acoustic Performance:** Up to $R_w 45 \text{ dB}$ for improved interior comfort
- **Integrated Features:** Supports concealed hinges, drainage solutions, flyscreens, and DigITrace digital identification
